Happy New Year: 2017 the Greenest Yet!

Hello and welcome to our first Carbon Capture newsletter of 2017.

We would like to take the time to thank you for your continued support throughout 2016 as we look to the year ahead, 2017 our greenest yet!

Throughout 2017 we will be proudly doing our bit for the environment, for wildlife and for future generations by supporting the Woodland Trust through Premier's Carbon Capture scheme.

In the Carbon Capture scheme the carbon emissions from our paper purchases are

calculated and then mitigated through our donations and support to the Woodland Trust.

The Woodland Trust are the largest woodland conservation charity in the UK and through our continued support maintain and redevelop native woodland right here in the UK.

A noble gesture for a noble cause and we cannot wait to get started Carbon Capturing for the year 2017 – we hope that you can join us in our environmental endeavours as we look to make 2017 our greenest year yet!

Tree of the Month: Ash

Common ash is found across Europe, from the Arctic Circle to Turkey. It is the third most common tree in Britain. It is currently being affected by Chalara dieback of ash, a disease caused by the Hymenoscyphus fraxineus fungus (previously Chalara fraxinea).

Ash trees can live to a grand old age of 400 years - even longer if coppiced.

When fully grown, ash trees can reach a height of 35m. Tall and graceful, they often grow together, forming a domed canopy. The bark is pale brown to grey, which fissures as the tree ages.

Easily identified in winter by smooth twigs that have distinctively black, velvety leaf buds arranged opposite each other.

Join the Woodland Trust

Become a member of the Woodland Trust today and get a FREE rowan sapling! Visit www.woodlandtrust.org.uk for more information.

Office Paper

Now Available in 80gsm!

The Woodland Trust's branded range of office paper, is now available in 80gsm, excellent news for users of copier paper who want to help the environment.

Woodland Trust Office Paper is a high white, totally chlorine free office paper that is produced to the most demanding environmental standards at an integrated mill, minimising transportation and supplying clean water to the locale environment and excess heat to local civic buildings.

Woodland Trust Office Paper has been readily Carbon Captured, helping to create new native woodland in the UK by supporting the Woodland Trust, capturing CO₂ emissions by planting new native woodland.
